

INTERUNIVERSITARY RESEARCH CENTER "TERRITORY AND LANDSCAPE PLANNING"

Sant'Anna School of Advanced Studies of Pisa - University of Camerino

**International workshop
RESILIENT LANDSCAPES**

June 3, 2014, Abbadia di Fiastra(MC), "Salone delle Feste"

In physics, resilience is the capacity to resist impulses, to react to unexpected impacts without breaking apart. Designing resilient cities means favouring the ability of a community to modify itself in order to respond positively to climate changes that often create drastic effects on the form and operation of the urban landscape and the social, economic, and environmental characteristics that characterise it.

Finding tools suitable for governing the relationships between these changes and urban sustainability is a major challenge for the next decade. To hope to succeed, however, it is necessary to understand and interpret as well as possible the ecological cycles of the city, the safety of the urban environment, and the relationship between urban form and quality of life in order to then select those "landscape models" that can provide direction in defining new "urban models".

To reduce the negative effects of unexpected climate change and enhance the positive aspects, good governance therefore starts from resilience by selecting the best policies, plans, and projects for the regeneration of cities in crisis. The seminar "Resilient Landscapes" aims to open a discussion on these themes with the participation of internationally renowned scholars, basing it on experiences in applied research and the policies and plans of regions in Central Italy.

INTERUNIVERSITARY RESEARCH CENTER "TERRITORY AND LANDSCAPE PLANNING"

Sant'Anna School of Advanced Studies of Pisa - University of Camerino

**International workshop
RESILIENT LANDSCAPES**

June 3, 2014, Abbadia di Fiastra(MC), "Salone delle Feste"

AGENDA

- 09.00 Registration
09.30 Welcome and Opening of the Conference

Section I - The resilience of the landscape and socio-economic development

Chair and introduction

Silvia Viviani, President of the National Institute of Urbanism - INU

- 10.30 *Climate change: local action and global balance*
Francois Mancebo, Director of the International Research Center on Sustainability (IRCS) and of the Institute of Regional Development, Environment and Urban Planning (IATEUR), University of Reims
- 11.00 *The crises of urban landscape: economic and social origins*
Oriol Porcel Montanè, Department of Geography of the Autonomous University of Barcelona; former director of the European Network of Local and Regional Authorities for the Implementation of the European Landscape Convention
- 11.30 *Coffee break*
- 11.45 *Urban regeneration for new urban landscapes*
Michele Talia, Scientific supervisor of the research center
- 12.15 *Resilient landscapes for a sustainable urban economy*
Marco Frey, Scientific supervisor of the research center
- 12.45 *Resilient landscapes to improve the quality of life*
Massimo Sargolini, Scientific supervisor of the research center
- 13.15 *Light lunch*

Section II - Applied research

- 14.40 *Chair and introduction*
Massimo Sargolini, University of Camerino
- 14.50 *Resilient plans and projects for the Adriatic landscape*
Rosalba D'Onofrio, University of Camerino - spin-off Terre.it
- 15.10 *Plans and projects for (resilient) territories and landscapes. Tuscany experiences and case studies*
Fabrizio Cinquini, spin-off Terre.it
- 15.30 *Landscape, territorial attractiveness and economic development:
a research outline in Tuscany Region*
Massimo Battaglia, Sant'Anna School of Advanced Studies of Pisa - spin-off Ergo
- 15.50 *Resilient projects for new and existing buildings*
Maria Federica Ottone, University of Camerino - spin-off Pensy
- 16.10 *Informal planning for resilience. Suggestions from urban gardening in Ghent*
Chiara Certoma, Sant'Anna School of Advanced Studies of Pisa

Section III - The needs of the territory

- 16.30 *Chair and introduction*
Michele Talia, University of Camerino
- 16.40 *Agricultural land use and environmental management*
Paolo Papa, Umbria Region
- 17.00 *Environmental networks and landscape design*
Achille Bucci, Marche Region
- 17.20 *Risk management and territorial planning*
Antonio Sorgi, Abruzzo Region
- 17.40 *Soil drawing and landscape planning*
Tuscany Region*

* To be confirmed

International workshop RESILIENT LANDSCAPES

June 3, 2014, Abbadia di Fiastra(MC), "Salone delle Feste"

USEFUL INFORMATION

How to reach the Abbadia di Fiastra Natural Reserve (<http://www.abbadiafiastra.net/en/>)

To find Abbadia di Fiastra Natural Reserve on Google Map please click on the following [web link](#)

By car

From the Adriatic coast:

The A14 provides road access from the Adriatic coast. Exit the Autostrada at Civitanova Marche / Macerata drive forward 50 m. to the T-junction with roundabout. Go around the roundabout in an anticlockwise direction to take the road to the left.

200m turn right onto the SS77 superstrada in the direction 'Foligno - Tolentino - Macerata'.

After 27 km. Exit the SS77 at 'Macerata Ovest'. Drive round the loop and turn right in direction 'Ascoli Piceno – Sarnano'.

After 3 Km, on the left, is Fiastra Abbey Nature Reserve.

From Rome:

Drive towards Spoleto and Foligno, then turn onto the SS77 superstrada in the direction 'Macerata'. Exit the SS77 at 'Macerata Ovest'. Turn right in direction 'Ascoli Piceno – Sarnano'.

After 3 Km, on the left, is Fiastra Abbey Nature Reserve.
